CAREER OBJECTIVE

A motivated engineering graduate seeking opportunities to work in a challenging environment. I wish to apply engineering principles to real-world projects and enhance my technical skills. My goal is to grow along with the organization.

EDUCATION

(B.E)- Computer Science Engineering - 2022-2026

Dhanalakshmi Srinivasan Engineering College, Perambalur

SKILLS

- | | | |
|-----------------------|-------------------|------------------|
| • Python | • C++ Programming | • C Programming |
| • Computer Networking | • Adobe Photoshop | • Cyber Security |
| • Git | • GitHub | • MS Office |

INTERNSHIP

Cyber Security Intern – Retech Solution Pvt, Chennai

- Completed a Cyber Security internship with hands-on exposure to fundamental security concepts & threat analysis.
- Gained practical experience in image analysis and digital evidence detailing for basic cyber investigations.
- Learned map reading and geolocation fundamentals to support situational awareness and cyber intelligence tasks.
- Studied common cyber attacks & security mechanisms, including basic prevention and system protection techniques.
- Developed foundational understanding of security systems, vulnerabilities, and safe computing practices.

PROJECT

Python-Based Chatbot – Bag Bot

- Developed an interactive chatbot using Python to automate user interactions and provide real-time responses.
- Applied Natural Language Processing (NLP) techniques for text preprocessing and intent recognition.
- Implemented efficient conversation flow logic to handle user queries and fallback scenarios.
- Tested and optimized chatbot performance to improve response accuracy and user experience.

Electronic Nose for Evaluating Seafood Freshness Using Machine Learning - Ongoing

- Developing an Electronic Nose system to evaluate seafood freshness by analyzing volatile gas sensor data.
- Applying machine learning algorithms to classify freshness levels based on extracted sensor features.
- Performing data preprocessing, feature extraction, and model training to improve prediction accuracy.
- Analyzing system performance using evaluation metrics to validate reliability and consistency of results.
- Demonstrating the use of sensor-based intelligent systems for food quality monitoring applications.

CERTIFICATES

Cyber Security Basics - Guvi

Mastering Black Hat Techniques: Guide to Hacking & Cyberse - Udemy

ADCP- C,C++,Python - Cadd Cae Campus
